GAYATRI BUSINESS

SEO Plan: What Claude Can Do, How, and What It Costs

A record of our discussion on search engine optimisation for gayatri-business.com, prepared for a founders' review.

Prepared for: Divyansh Singh (Founder) and Mohammed Zaman Shaikh

Prepared by: Claude

Date: 31 October 2026

Scope: Pan-India organic search for gayatri-business.com (website already built)

1. Summary

- **Can Claude run SEO for Gayatri Business?** Yes: the audit, keyword research, technical fixes, page templates, calculators, articles and monthly reports.
- **Target:** pan-India search, organised by sector and topic rather than by city.
- **Cash cost in year one:** ₹0, or about ₹11,000 if we rent a paid keyword tool for one month.
- **What it needs from us:** about 2 hours a week from Divyansh (reviewing articles, interviews) and about 1 hour a week from whoever publishes changes.
- **Realistic timeline:** first rankings for specific searches in 3–6 months; broader national terms in 6–12 months.
- **Payback:** one MIS Monthly client (₹35,000 × 12 = ₹4.2 lakh a year) covers even the highest budget option.

Questions covered in this document

#	Question asked	Section
1	Can you do SEO for my business?	2
2	How will you do it?	3
3	We want pan-India search, not local. What changes?	4
4	How would a paid SEO expert or CTO design this?	5
5	What is the budget, with frugality, given the website is already built?	6
6	Can't you do all of this for free?	7
	Decisions for the founders and next steps	8

2. Can Claude do SEO for Gayatri Business?

> *"Can you do a SEO of my business? Just reply with a yes or no."*

Yes.

3. How the work would be done

> *"Can you explain how will you do it?"*

1. **Audit the website.** Technical checks (mobile speed, indexing, broken links, sitemap, HTTPS); on-page checks (titles, descriptions, headings and URLs aimed at real searches); content (one page per service that answers what owners search); trust signals (founder credentials, results, contact details, reviews). The output is a fix list, most important first.
2. **Keyword research.** Find what owners type into Google, e.g. "MIS reporting for small business", "how to improve cash flow in manufacturing business", "fractional CFO India". Match each search term to one page so pages don't compete with each other.
3. **Fix and write.** Rewrite titles, descriptions and headings; add schema markup (code that tells Google you are a business, with services, founder and FAQs); publish articles answering owner questions. Reels can become articles, e.g. "Operating vs financial leverage for business owners".
4. **Google Business Profile.** Category, services, photos, posts and a simple way to ask clients for reviews.
5. **Track results.** Monthly rankings, traffic and enquiries, then adjust.

Honest limits. No paid SEO tool access by default (Ahrefs or Semrush), so search volumes are estimates. SEO usually takes 3–6 months to show results, and nobody can guarantee a #1 ranking.

4. The pan-India focus

> *"I want a PAN INDIA search since we're looking for a broader market to get on to."*

What changes	How
Keywords target topics, not cities	Searches owners make anywhere in India: "MIS reporting for MSME", "how to improve cash flow in business", "business coach for family business India". Start with specific, high-intent searches that big firms ignore, then move to broader terms as authority grows.
Pages by sector, not by city	One page per industry: manufacturers, distributors, EPC firms, family businesses. A promoter searching their own sector lands on a page that speaks their language.
Content is the main engine	A library of practical articles: leverage, working capital, break-even, debtor days, MIS. Hindi or Hinglish versions of the most popular topics.
Remote delivery made clear	The site says plainly that the Discovery Call and every service work online, for any city.
Earned backlinks	Guest articles on MSME and business publications, industry associations, podcasts, and LinkedIn articles from Divyansh.

Unchanged: the audit, technical fixes, schema markup and monthly tracking. The Google Business Profile still helps for brand searches, but is no longer the focus.

Timeline: 3–6 months for the first specific searches; 6–12 months of steady content and backlinks for broader national terms.

5. How a professional SEO lead or CTO would design it

> *"How would a Paid SEO or a CTO would design an Search Engine Optimization for my website?"*

A professional treats SEO as a **lead-generation system**, measured in Discovery Calls booked rather than positions on Google.

#	Part	What it involves
1	**Goals and measurement**	Search Console and Analytics connected; every booking, WhatsApp click, call and form tracked; a 12-month enquiry target; each enquiry tagged with the page and search that brought it.
2	**Technical foundation**	Fast, secure site; good mobile speed scores (Core Web Vitals); clean URLs, sitemap and robots.txt; schema markup; hreflang tags if Hindi pages are added; uptime monitoring.
3	**Research**	A full keyword list grouped by intent (learning, comparing, ready to hire); competitor gap analysis; owner personas by sector.
4	**Site structure**	Service pages, sector pages, in-depth pillar guides (Cash Flow, MIS, Leverage, Pricing, Growth), free calculators (break-even, DOL, working capital, debtor days), case studies.
5	**Content engine**	4–8 articles a month mapped to search terms; founder name and credentials on articles (Google rewards real expertise in finance); reels and articles feed each other.
6	**Authority**	Digital PR, guest articles, associations, podcasts, LinkedIn from both founders.
7	**Conversion**	A clear ₹501 Discovery Call offer on every page, WhatsApp and call buttons on mobile, a short booking flow, pages tested to raise the booking rate.
8	**Reporting**	Monthly dashboard (traffic, priority rankings, enquiries, cost per lead) and a quarterly review.

Who does what

Role	Responsibility
SEO strategist	Research, planning, reporting
Developer	Technical fixes, speed, schema, calculators
Content writer	Articles, reviewed by Divyansh for accuracy
Outreach / PR	Backlinks and mentions

Timeline

Period	Milestones
First 90 days	Tracking set up, technical fixes, keyword plan, service and sector pages rebuilt, first articles published
Months 3–6	Steady content, first calculators, outreach begins; specific searches start ranking
Months 6–12	Broader national terms start to rank; enquiries compound

6. Frugal budget (website already built)

> *"What will be the budget to do all of this? … The website is already built, so provide me the budget keeping that in mind."*

Rough Indian market estimates as of late 2026, before 18% GST. These are the costs if outside help is hired for the parts Claude would otherwise do; Section 7 shows the version where Claude does that work.

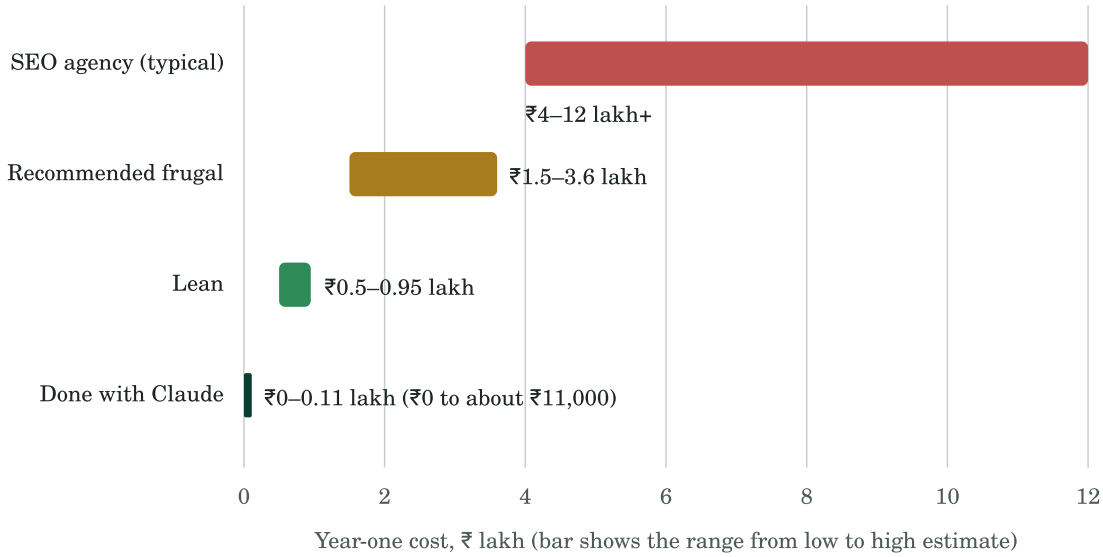

One-time costs

Item	Frugal choice	Cost (₹)
Audit, keyword research, SEO plan	Done by Claude	0
Developer fixes on the existing site	Freelancer, fixed scope from the audit	15,000–35,000
SEO research tool	Rent for one month only	10,000–12,000
SEO plugin	Free version	0
Three calculators (optional, month 3 or later)	Same freelancer	10,000–20,000
Total setup (without / with calculators)		**25,000–47,000 / 35,000–67,000**

Monthly costs

Item	Frugal choice	₹ / month
Hosting	Already paid; upgrade only if the audit shows the site is slow	0 (500–1,000)
SEO tracking	Free Google and Bing tools	0
Four articles	Claude drafts, Divyansh reviews, freelance editor polishes	4,000–10,000
Design	Canva	0–500
Backlinks and PR	Earned only; no paid links (Google penalises them)	0–5,000
Developer on call	Small fixes	2,000–5,000
SEO tool	One month per quarter, spread across three months	3,500–4,000
Total monthly		**9,500–24,500**

Year-one cost compared

Plan	What it covers	12-month cost (₹)
SEO agency (for comparison)	Typical small-business retainer	4,00,000–12,00,000+
Recommended frugal	Everything in this section, including calculators	1,50,000–3,60,000
Lean	Developer fixes plus a minimal editor; founders and Claude do the rest	50,000–95,000
Done with Claude	**Claude does the developer, writing and analysis work (Section 7)**	**0–11,000**

Payback. One MIS Monthly client at ₹35,000 a month is ₹4,20,000 a year, which covers even the top of the Recommended frugal budget.

7. Can Claude do it for free?

> *"Can't you do all this for free?? Aren't your skills, plugins, and connectors capable of being an Expert SEO or CTO?"*

Mostly yes. Most of the budget above pays for work Claude can do directly. A few items still need a person or a small amount of money.

What Claude does at no extra cost

Work	How	Saves (₹)
Technical and on-page audit	Crawls the live site; checks speed, indexing, titles, headings, schema, mobile layout	—
Keyword research and site plan	Web search, competitor study, mapping search terms to pages	—
Developer fixes	Writes the code: speed fixes, schema markup, tracking, page templates	15,000–35,000
Calculators	Builds break-even, DOL and working-capital tools as working code	10,000–20,000
Articles	Drafts them in full; Divyansh reviews	4,000–10,000 / month
Google Business Profile	Writes the profile, services, posts and review-request messages	—
Monthly reports	Analyses Search Console and Analytics data, recommends next actions	—

What still needs a person or money

Item	Why	Cost
Putting changes live	Claude needs the site's code (GitHub or files), or someone pastes in the changes using exact step-by-step instructions. Claude will not log into admin panels with passwords.	~1 hour / week
Exact search volumes	Precise numbers come from paid tools; otherwise Claude estimates from free sources (Keyword Planner, Search Console, autocomplete).	₹0, or ~₹11,000 for one month
Backlinks and PR	Need real relationships: interviews, guest articles, association talks. Claude writes every pitch.	Founder time
Expert review	Google rewards real expertise in finance content; Divyansh approves each article.	~2 hours / week
Hosting	Already paid.	₹0 extra

Revised year-one budget	Amount
Cash	₹0, or ~₹11,000 with one month of a paid keyword tool
Time	~2 hours / week (Divyansh) + ~1 hour / week (publisher)

The only other cost is the existing Claude subscription that Claude runs on.

8. Decisions for the founders and next steps

Decisions to agree on

1. **Budget:** start at ₹0 (Claude does the work), or rent a paid keyword tool for one month (~₹11,000)?
2. **Who publishes:** give Claude the site's code, or assign a team member to paste in changes (~1 hour a week)?
3. **Founder time:** can Divyansh commit ~2 hours a week to reviewing articles and doing interviews?
4. **Language:** add Hindi or Hinglish content, yes or no?
5. **Target:** how many qualified enquiries a month from search would make this worthwhile in 12 months?

What Claude needs to start

#	Item	Required?
1	Website URL, for the free audit	Yes
2	What the site is built on (WordPress, Wix, Webflow or custom code)	Yes
3	A Search Console export, or the site's code on GitHub	Optional, recommended

Suggested first step: send the website URL. Claude runs the full audit and returns a prioritised fix list, so the founders can decide with real findings rather than estimates.
